

GP Connect Access Record Structured

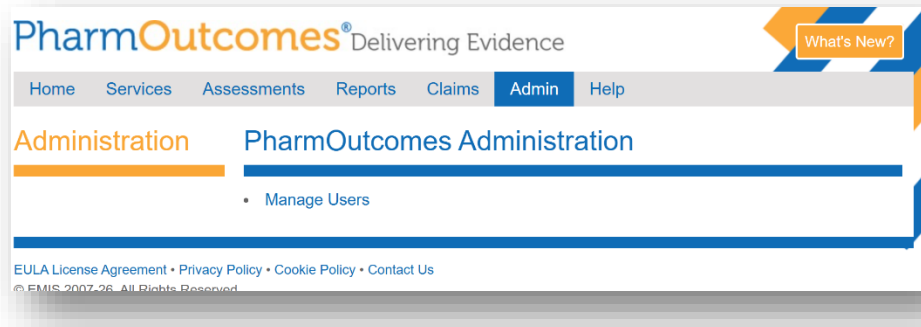

This new feature, which has been introduced across all National Advanced Services on PharmOutcomes, supports practitioners in their clinical decision-making. **GP Connect Access Record Structured(ARS)** provides quick access to relevant patient information held within the GP record. This information is presented directly within the PharmOutcomes service page, enabling more informed and efficient consultations.

Activation and access conditions

Only registered professionals who have had their professional details entered in their User Account will be able to have GP Connect Access Record activated on their user account. The details required are:

- Full name
- Job title
- Professional body
- Professional Registration Number

An **Admin** user at the branch is required to activate the functionality. To do this, from the Admin tab of PharmOutcomes select **Manage Users** >

From the user list displayed, select the required user by clicking EDIT to the right of the name

Ensure all their professional details have been entered.

A screenshot of the 'User Information' form. The form is titled '- User Information' and contains several fields. The 'Organisation' field is set to 'PharmOutcomes Test Provider' with 'Organisation Type: Provider' below it. The 'User Name' field has a text input and a note: 'This is the name that the user will log into the system with. It is recommended that this takes the form of first last but this is not essential and you can use the email address if preferred.' The 'Full Name' field has a text input and a note: 'When addressed in emails, this is the name that will be used.' The 'eMail Address' field has a text input and a note: 'An email address that can be used for confirming user information, changing passwords and system updates.' Below these are fields for 'Job title', 'Professional body' (a dropdown menu), 'Professional Registration Number', 'Phone Number', and 'Mobile Number'. A red box highlights the 'Full Name', 'Professional body', and 'Professional Registration Number' fields. At the bottom, there is a section titled '- GP Connect Access Record' with an 'Access' dropdown menu set to 'No'. A yellow box on the right side contains a 'Creating users' warning: 'To ensure user security, the passwords are one-way encrypted before being recorded in the database. When you save the User information, a password will be generated for them and sent to the email address specified here.'

Scroll down to the section, **GP Connect Access Record**, in the **Access** box, select **Yes**, then click **Save**. ARS is now active for that user

NHS Number: 944 900 1758
Address: 10 GREENCLIFFE AVENUE, BILDON,
SHIPLEY, W YORKSHIRE
Postcode: BD17 5AF

Patient's GP Details

GP ODS Code: N81093

You may unlink this PDS patient record from the provision by clicking "Unlink PDS match".

GP Connect Access Record

Has the patient provided permission for you to view their GP record?

Patient Name

Date of Birth
50 years of age

Gender Male Female

Postcode

Address

NHS Number
If neither the client nor the provider know the NHS Number, you can enter "Unknown". If the client has never been issued with an NHS Number, you can enter "Not Issued".

In PharmOutcomes, once the PDS check is complete and the correct patient has been selected, the GP Connect Access Record functionality is displayed.

In the GP Connect Access Record section, to confirm you have received permission from the patient to view their GP record, click **Yes**. This activates the Launch GP

1. Connect Access Record button.

The screenshot shows a web form titled "GP Connect Access Record". At the top, it asks "Has the patient provided permission for you to view their GP record?". There are two radio buttons: "Yes" (selected) and "No". To the right is an orange button labeled "Launch GP Connect Access Record". Below this is a text input field for "Telephone number". Underneath is a dropdown menu for "Patient's GP Practice" with "Temple Sowerby Medical Practice, Linde" selected. Below the dropdown is a note: "Start to type GP practice name and select from drop down list". There is a checked checkbox for "try to filter results by 'nearest first' ..." and a note: "... nearest to either patient postcode (if found) otherwise your provider postcode".

2. Click **Launch GP Connect Access Record**, to display the patient's GP record showing clinical data views (opening in a new window) for:

3.

- Medications (default view)
- Investigations
- Observations
- Allergies (currently accessed via a link within the Allergies section)

The screenshot shows the "PharmOutcomes® GP Connect Access Record" page. At the top, there is a header with the PharmOutcomes logo and a decorative graphic. Below the header, patient information is displayed in three columns: Name: LISTON, Janine; Gender: Female; Address: 3 Council Houses, Low Hesket, Carlisle, CA4 0HF; Date of Birth: 24-Jan-2011; Age: 13 year(s); NHS Number: 973 014 7140; GP Practice: Temple Sowerby Medical Practice; GP Address: Linden Park, Temple Sowerby, Penrith, Cumbria, CA10 1RW. On the left, there is a navigation menu with "Medications" selected. The main content area is titled "Medications" and contains explanatory text about acute medications. At the bottom, there is a filter bar with options: Acute, Repeat, Repeat Dispensing, Prescribed Elsewhere, and Discontinued.
